The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 09/651,875	Applicant(s) UNDERWOOD ET AL.	
	Examiner JOSHUA D. CAMPBELL	Art Unit 2178	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 11 December 2008.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.

DETAILED ACTION

1. This action is responsive to communications: Amendment filed 12/11/2008.
2. Claims 9-14, 54, and 56 are pending in this case. Claims 9, 54, and 56 are independent claims. Claims 9, 54, and 56 have been amended.
3. The rejection of claim 54 under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter has been withdrawn in view of the amendments.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

5. Claims 9, 10, 54, and 56 remain rejected under 35 U.S.C. 102(e) as being anticipated by Horstmann (US Patent Number 5,995,099, filed on June 10, 1996).

Regarding independent claim 9, Horstmann discloses identifying web content associated with a first source and identifying a web page of the web content (bicycles) which the user has the authority to edit (column 1, lines 5-50 and column 2, lines 42-54 of Horstmann). Horstmann also discloses identifying a second type of web page that the user does not have the authority to edit containing the web content (in this case, books about bicycles) and identifying the web content (books) of the second source (column 1, lines 5-50 and column 2, lines 42-54 of Horstmann). Horstmann discloses that based on the information input by a builder of the one or more first type of web pages automatically building a web page of the first type for an owner of the web page of the second type of pages (column 4, line 43-column 5, line 33 of Horstmann). Horstmann discloses validating the placed hyperlink (column 5, lines 5-24 of Horstmann). Horstmann discloses sending to a second source a request to add a second link on a web page of the web content of the second source, the second link linking the web page of the second source with web content of the first source (column 2, line 63-column 3, line 26 of Horstmann). Horstmann also discloses placing a link on the first type of web page that links to the web content of the second source (column 1, lines 40-42 of Horstmann) and based on this a referral is generated (column 1, lines 43-50 of Horstmann).

Regarding dependent claim 10, Horstmann discloses presenting a prompt for an acceptance of generated link (page owner has the ability to deny, accept, edit, or delete links via prompt) (column 5, line 35-column 6, line 21 of Horstmann).

Regarding independent claim 54, the claim incorporates substantially similar subject matter as claim 9. Thus, the claim is rejected along the same rationale as claim 9.

Regarding independent claim 56, the claim incorporates substantially similar subject matter as claim 9. Thus, the claim is rejected along the same rationale as claim 9.

Claim Rejections - 35 USC § 103

6. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

7. Claims 11-14 remain rejected under 35 U.S.C. 103(a) as being unpatentable over Horstmann (US Patent Number 5,995,099, filed on June 10, 1996) in view of Gentner (US Patent Number 5,724,595, issued March 3, 1998).

Regarding dependent claims 11-14, Horstmann discloses that the client device is a computer (multipurpose input-output device), which would include a portable computer (wireless device), is connected to the Internet or other network (column 7, line 63-column 8, line 67 of Horstmann). Horstmann does not explicitly disclose displaying the first type of web pages with web content of the second source which is based upon one or more characteristics of the web content associated with the second source. However, Gentner discloses that when a user creates a link on a first type of page to the content of a second source that web content from that source defined by the content of the source is included in the display of the web page with the link (column 1, lines 55-

67 of Gentner). It would have been obvious to one of ordinary skill in the art at the time the invention was made to have combined the teachings of Horstmann with the teachings of Gentner because it would have increased the efficiency of creating links between web pages.

Response to Arguments

8. Applicant's arguments with respect to claims 9-14, 54, and 56 have been considered but are moot in view of the new ground(s) of rejection. Specifically, Horstmann discloses that based on the information input by a builder of the one or more first type of web pages automatically building a web page of the first type for an owner of the web page of the second type of pages (column 4, line 43-column 5, line 33 of Horstmann).

Conclusion

9. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the

shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
